

SCHLEIFRING

LubeLife

INTRODUCTION

SCHLEIFRING is a byword for absolute precision and reliability in data, signal and media transmission.

During the last 40 years we have gained extensive experience during the development of over 100,000 slip rings and have been able to refine our expertise right down to the smallest detail. Maintenance plays a significant role for us in order to guarantee the quality and service life of every single slip ring. To achieve this, we can draw on the maintenance and engineering know-how of our staff as well as experience gathered from a huge number of applications at our customers' sites.

In addition to a complete contacting system, with the **LubeLife** contact lubricant series SCHLEIFRING also offers individualised state-of-the-art maintenance. With our expertise and our strong focus on research, we have adapted the formulas for the **LubeLife** series to cover every requirement and condition, resulting in five different types of oil.

Each of these oil sprays improves the efficiency as well as the transmission quality of your gold-wire system. They contribute to the longevity and contact reliability of your slip ring, as confirmed by long-term studies.

Exact metering guidelines tailored to your system are to be found in the assembly instructions supplied with your slip ring. In this way, we would like to further optimise slip ring maintenance and simplify the maintenance process for you with a simple solution.

Don't let your maintenance slip and discover ...

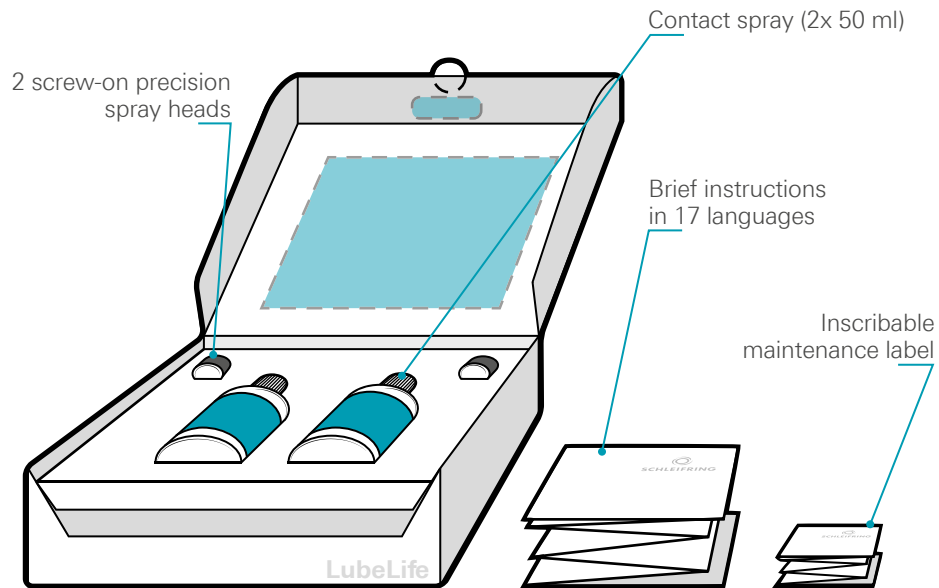

... the advantages of LubeLife:

You receive a carton containing two cans of **LubeLife** of the type that meets your specific requirements selected from among the five available options.

A box that contains everything you need to carry out optimum maintenance work to the highest technical standards.

The **LubeLife** carton

LubeLife **Wind**

WIND **outdoor**

For all conditions in wind farms

Offshore

Onshore

LubeLife **Industry**

INDUSTRY **indoor**

For industrial applications in indoor areas
Ideal for temperatures from 0 °C to 40 °C

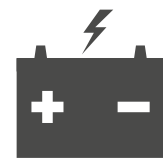

LubeLife **HighPower**

HIGH
POWER **extreme**

For extreme requirements of power slip rings
High life expectancy

LubeLife **LowTemp**

LOW
TEMP
sensitive

For sensitive data transmission
Ideal for temperatures below 0 °C

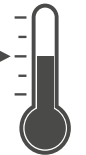

LubeLife **HighTemp**

HIGH
TEMP
sensitive

For high ambient temperatures above 40 °C
up to 70 °C
High life expectancy
